SUMMARY

Bachelor of Software Engineering graduate from Telkom University with knowledge and experience in programming (PHP, JavaScript, Java, Golang), software development (Web, Mobile), project management, and network basics. Have hands-on experience as a Backend Developer Intern for 1 year and 6 months at Telkom Indonesia. Passionate about software development and have developed expertise in both front-end and back-end. I am excited to use my skills to deliver innovative and comprehensive solutions.

EXPERIENCE

Telkom University – Bandung, Indonesia

Web Developer | Direktorat Penelitian dan Pengabdian Masyarakat (March 2024 – Now)

- Development and management of research and community service websites for the benefit of all university members at Telkom University (i-Platinum).
- Utilized both frontend and backend programming skills to create user-friendly and informative platforms.
- Ensured website functionality, responsiveness, and accessibility across various devices.
- Contribute to the mission of the Direktorat Penelitian dan Pengabdian Masyarakat by providing online tools accessible to all members of the University for research and community service processes.

PT TELKOM INDONESIA (PERSERO) TBK – Bandung, Indonesia

Back End Developer at Joint Development Telkom | Chapter DPE (February 2023 – July 2023)

- Designed and implemented RESTful APIs using Node.JS, prioritizing best practices, scalability, and performance optimization.
- Ensured seamless communication between the front-end interface, databases, and other systems for efficient data interchange and functionality.
- Integrated the APIs with MongoDB to guarantee data consistency, security, and efficient data retrieval.
- Worked in an agile development environment, participating in daily stand-ups, sprint planning, and regular code reviews to ensure efficient collaboration and continuous improvement.

PT TELKOM INDONESIA (PERSERO) TBK – Bandung, Indonesia

Backend Developer Intern | Telkom DBT (February 2022 - January 2023)

- Learn and practice the core engineering of Telkom Indonesia's back-end stack, such as microservices, Kubernetes, CI/CD, Docker, and the CQRS design pattern.
- Collaborated with a team to recreate one of Telkom Indonesia's products as closely as possible, based on its features and services.
- Demonstrated the ability to reverse engineer complex systems, showcasing problem-solving and analytical skills.

EDUCATION

TELKOM UNIVERSITY (2019 - 2023)

Bachelor of Software Engineering - GPA 3.6 (Graduated Cum Laude)
